## From the Manager's Desk

Dear Readers,

This issue of the Scholar Times revolves around challenges for contemporary education in fulfilling ambitions. Young learners of the 21st century are quite different from our times about 5 decades back.

Aspirations of students and their parents from a good public school are diverse. Not only academic excellence but physical well-being and spiritual growth. Having spent more than 5 decades in the field of contemporary education, it is my strong belief that we all have to change with the changing times as **Change is the Law of Nature**. We must move in the right direction in pursuit of bigger goals
